Issue The problem addressed is supporting legislation and making community members aware of right-to-life issues.

Project Description I have been involved in many pro-life campaigns in the past and am now creating one of my own through the Nebraska Right to Life Organization. I'm going to raise awareness of right-to-life issues by putting together a 5K run/walk and giving the money raised from event to the Nebraska Right to Life Organization. I also will be putting together a life chain by speaking to local churches and putting out fliers and posters. We will gather on a busy highway and hold signs so others driving by can be made aware of the pro-life issues as well. I want to make not just the community but the U.S. Senate and congressmen aware of the "Women's Health Protection Act." This act supports abortion. I am supporting Senator Graham's Bill S. 1670, virtually identical to legislation (H.R. 1797) passed by the House of Representatives in June of 2013. This bill help to protect pain-capable unborn children from elective abortion. A lot of help has come from Father Donavon who has found many great articles about pro-life for me. I also have networked with other individuals who have presented to the Nebraska Unicameral.

Project Outcome In the past, I've been involved in many religious protests opposing abortion. Although not quite completed, the project that I am developing will reach out not only to surrounding communities but also to senators and congressmen making them aware of the issues of abortion.

Request I would like to know from my senators to where they stand on the S. 1670 bill. The goal for me is to make them knowledgeable about this bill and support its passage.
